Dependable individual with exceptional people skills. Real team player committed to high levels of job performance. Positively interacts with employees alike. Goal oriented and a capable problem solver.

## ***Skills***

---

C++  
Java  
Python  
Git  
Powerpoint  
Data structures and algorithms  
Database Design

## ***Projects***

---

### **Car Rental System**

- Developed a basic car rental system where users can view available cars, make reservations, and check rental history.

### **Job Listing Webscraper**

- Developed a Python web scraper to extract job listings from popular job boards, collecting data such as job titles, company names, locations, and descriptions, and exporting results to a CSV file for analysis.

### **Banking Application**

- Designed and implemented a secure banking application using Java, enabling users to create accounts, check balances, transfer funds, and track transaction history with integrated data encryption and error handling.

### **Player Tracker and Analyzer**

- Developed a real-time player tracking system using YOLO, capable of identifying multiple players on the field, generating performance analytics such as speed and distance, and visualizing movements through a web-based dashboard with integrated notifications for key events.

## ***Education***

---

**Expected in 2027**

### **Bachelor of Science: Computer Science**

*Purdue University - West Lafayette, IN*
